I Site Identification

i. Site Description

Delta Shor Works as reported in WAPORA File 'D' at one time consisted of 6 different divisions. In 1969 the firm was sold and split up. Chromalloy American of St. Louis bought the major fraction and Delta Services Industries the rest.

The firms owned by Chromalloy American are:

- 1) Delta Safety and Supply
- 2) Delta Construction
- 3) Delta Fabrication
- 4) Delta Mud & Chemical
- 5) Delta Shipyard

The sixth division from Delta Shor Works is now Delta Services Industries.

Mr. Rosanna Leperski (gen. dir. of Chromalloy) said that Mr. Talbot has bought out the Delta companies.

Delta Iron Works - no longer in existence
was part of Lg. Corp. which has been split up.

Reggie Lerete: Safety officer -
not there.

Delta Shipyards -

Groundwater for Houma

Houma is an area of the Lower Mississippi Region where fresh ground water is not available in significant quantities. According to the U.S.G.S. 1979 ~~report on~~ Summary Appraisal of the National Ground Water Resources - Lower Mississippi Region there are no major freshwater aquifers in this area. Houma lies in an area where wells yield 500 or more gallons per minute but ~~so~~ the salt content is variable due to the proximity to the northern most salt water intrusion boundary.

Dissolved solids concentrations ^{in groundwater} approx 1,000 to 3,000 milligrams per liter; ~~is~~ somewhat lower in low-flow surface streams. The prevalent chemical type of streams in low-flow is calcium magnesium carbonate-bicarbonate type.
